eLearning SOLUTIONS

Utilizing Solarity's Learning Management System (LMS), we can build and enable customized learning solutions, creating a space for both organizations and individual learners to receive specialized training, resources to enhance learning, and serve as a repository for recorded training sessions. This platform enables both learning of new skills and refresher training for Professional Development Units (PDUs) through video and interactive Computer-Based Training modules (CBTs).

Existing eLearning courses include:

Team Building

Learn the definition and objectives of team building, common barriers to team building and strategies to overcome them, and some team building activities.

.5 PDUs

Medicaid 101

Series of 3 videos on introduction to Medicaid, health information technology, and MMIS

Client Expectations and Lessons Learned CBT

Learn how to manage client expectations and satisfaction, what a project blueprint is, and the importance of utilizing lessons learned on a project.

1 pdu

Project Management and Emotional Intelligence

Learn what emotional intelligence is and why it is so important, the benefits of implementing emotional intelligence, and how to lead and help others with emotional intelligence on your projects.

.75 PDUs

PMI's Domains, Tasks, and Enablers

Learn about the domains within which projects occur.

.5 PDUs

Time Management

Learn about effective time management skills, goal setting, SMART objectives, and prioritization.

1 PDU

ESSENTIAL SKILLS WORKSHOPS

Designed to stimulate thinking, and increase team awareness and performance, Solarity's workshops can be **customized to each client and need**, in 1 hour or with a full day, interactive session.

An Introduction to Design Thinking

Have you ever been stuck? What can you do when there's a messy situation and you're not sure how to tackle it? Solarity will share an innovative approach to break mental boundaries and overcome problems called Design Thinking. This session allows participants to work together to come up with completely new ways to approach thinking about how to improve processes and overcome persistent problems.

Improving Team Performance: Understanding Personal & Team Strengths & Challenges

Understanding the strengths and challenges of our own personal style tendencies can help us be more productive, achieve greater job satisfaction, and increase effectiveness in project management. This workshop provides each participant with an assessment of their own personal style, and how to use it most effectively to contribute to the team. It provides an outline of strengths and challenges of each style and ways to work more effectively with people who have other styles of working.

Shift Happens! Growing Capacity to Manage Technical Change

Change or die. That's the hard reality facing professionals and organizations in today's quickly evolving technical landscape. Attendees will leave with a basic understanding of three attributes and disciplines for increasing individual and organizational capacity to take advantage of change instead of reacting to it.

Time Management:

Key Practices to Maximize the 1,440 Minutes in Each Day

One of the more precious resources anyone has is his/her time. In order to be effective in business, you need to be efficient with your time and priorities. Effective time management skills are the key to getting the most out of each day and surviving the increasing business pressures of 'doing more with less' in an increasing competitive business world. Attendees from any level of an organization will benefit from the tips and techniques discussed during this session to make the most of their time for professional and personal success.

Looking Behind the Process Curtain – Using Business Process Framework to Transform Your Business

How many times do businesses carry on outdated, ineffective, and/or overlapping processes without any idea why? When asked why something is done, how often is the answer "I don't know" or "We've always done it this way?"

Business Analysts enable change by defining needs and recommending solutions that deliver value. We look behind the organizational curtain to search out those hidden stumbling blocks slowing things down and develop new, better ways of doing business.

Team Building in Project Management

Learn the definition and objectives of team building, common barriers to team building and strategies to overcome them, and practice some fun team building activities.

Scrum Workshop

Hands on presentation using participant workbooks and scrum guide to teach agile and scrum processes and projects with activities.

our core areas of expertise

How do we create clear objectives, complete needed tasks with value, develop accurate schedules, manage our budget, while communicating status, risks, and issues to key stakeholders?

PROJECT MANAGEMENT

How do we gain clear requirements for what we need, while optimizing and clearly sharing our processes?

BUSINESS ANALYSIS

How can we effectively manage our time, communicate, resolve conflicts, negotiate and solve problems?

ESSENTIAL SKILLS

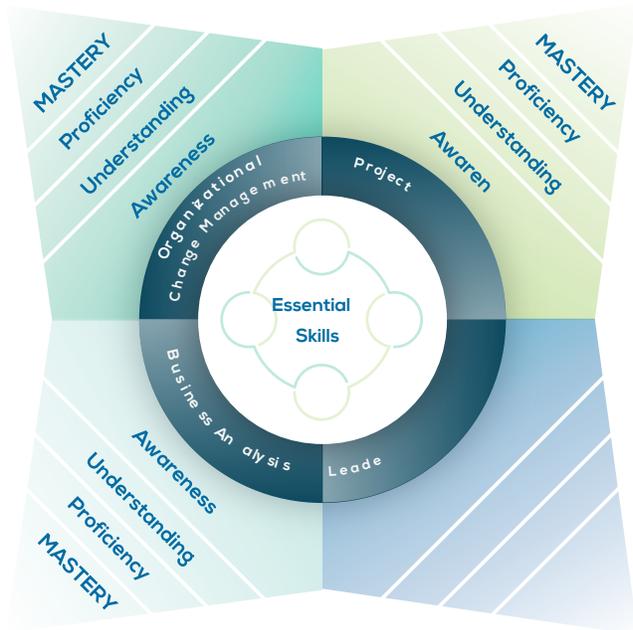

How do we ensure change in ways that engage the people affected so that they will adopt the solution and thrive in the new environment?

ORGANIZATIONAL CHANGE MANAGEMENT

How do we enable leaders with the tools and confidence needed to understand themselves, their strengths and challenges, and how to understand and lead others?

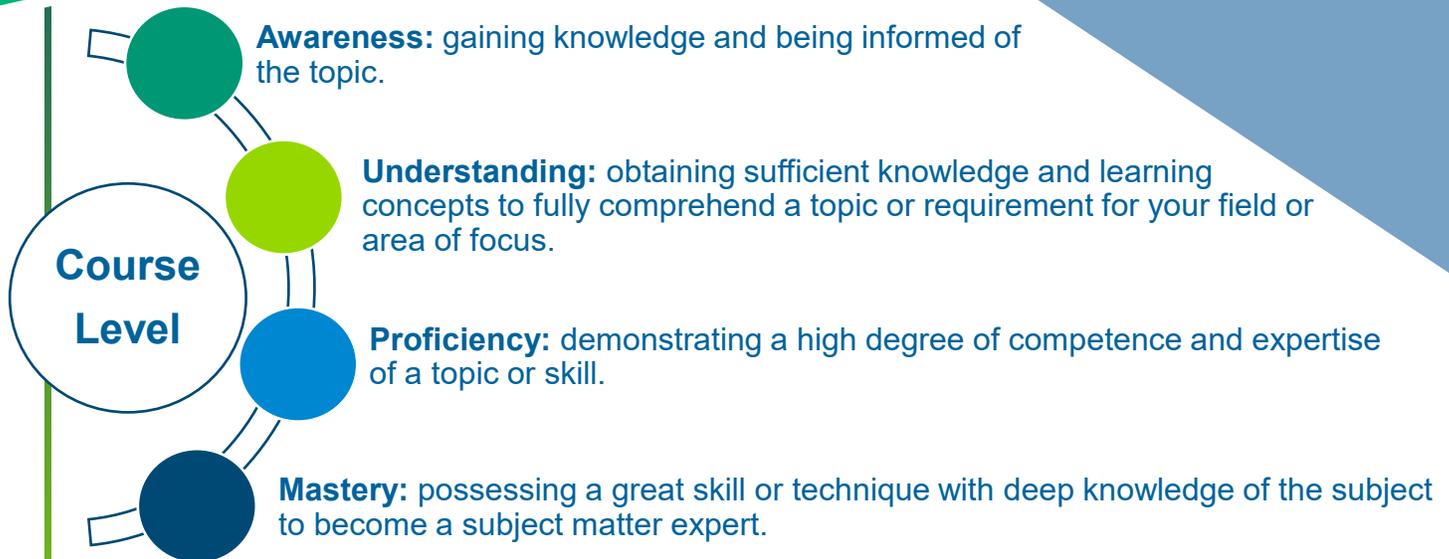

LEADERSHIP DEVELOPMENT

TRAINING & DEVELOPMENT PRACTICE MODEL

Our holistic approach delivers powerful training at the appropriate level for the individual or the organization, allowing for awareness, understanding, proficiency, and mastery in each discipline. We can deliver programs that enable ALL employees to gain access to the right amount of training needed to function at a high level in their role. For example, team members can benefit from a high-level awareness of all areas, but PMs will need more advanced training to gain proficiency and mastery in their role.

Key Guide

Delivery Method

On-Site: These courses take place at our Solarity training facility or at a designated location for corporate training. Fully in person training.

Virtual: These courses take place completely via virtual class with predetermined meeting times.

Face-to-Face On-Site or Virtual: These courses takes place in real-time with a mix of on-site and virtual learners. **The learner decides whether to attend on-site or virtual.**

Hybrid: These courses are a mix of on demand and fate-to-face sessions. We provide a suggested schedule to stay on top of course work to meet milestones for mandatory face-to-face virtual sessions.

On-Demand: You can start and finish these courses on your own schedule. They are a mix of videos and activity modules.

Length

The amount of actual time the course takes in hours or days to complete. Some courses may take several weeks but only meet once a week for a predetermined amount of time.

PDUs

The number of professional development units you can earn by completing a course.

Customize

Customizable for organizations to better meet their needs

Mastery

**PROJECT
MANAGEMENT**

Solarity's reputation as a premier training provider for topics on project management and HealthTech Solutions' designation as an Authorized Training Partner (ATP®) with the Project Management Institute (PMI®) are a winning combination. Some of our most popular courses include our 2-day Best Practices in Project Management and the PMP® Exam Preparation courses. We offer a variety of project management courses to build awareness and understanding of project management fundamentals, proficiency with best practices, and mastery through certification. Our training does not stop there, we provide continuing Professional Development Units (PDUs) to maintain certification and personalized refresher courses.

SOLARITY

A HealthTech Solutions Company

PROJECT MANAGEMENT PROFESSIONAL (PMP)

1 Obtain a basic understanding of project management vocabulary and skills by starting with our free **Project Management Primer** training

2 Learn some project management foundational knowledge and skills in our **Project Management Foundations** training.

3 Sign up for our 5-day **PMP®/CAPM® Exam Preparation** training. This course uses the approved PMI® Authorized Training Partner curriculum as well as provides test taking strategies, tips and tricks for passing the PMP exam, and application assistance. This training satisfies the required 35 hours of formal project management education required to sit for the exam. The course includes:

- The newest edition of the Project Management Body of Knowledge (PMBOK®) Guide and the Agile Practice Guide.
- Access to the LMS and specialized materials and study session videos.
- Individualized assistance with the PMP® exam application.
- A full-length practice exam and an individualized study plan and test date.

4 Complete your application and schedule your exam.

5 Stick with your study plan and take the second practice exam offered on the LMS. Your trainer is available to assist with any questions while you study for your exam.

6 Pass the exam and become an awesome project manager!

7 HealthTech Solutions/Solarity offers a **Best Practices in Project Management** training to help you transition into the certified project management world with real-world project management skills and tools.

At HealthTech Solutions and Solarity, a HealthTech Solutions Company, we offer more than just classes on project management. We focus on an integrated practices management model providing a complete training solution for our clients. We offer awareness in the basics of project management; understanding of what project management is and what it means to be a certified project manager; proficiency in project management skills; and mastery of those skills in order to pass the rigid PMP® exam for certification. Our trainings go far beyond live and virtual sessions. Our trainers work with you to provide study plans and additional materials; PMP®/CAPM® application assistance and review; tips, tricks, exercises, and practice exams; customized learning management system access; and personal access to an actual trainer to assist you through the certification process.

PMP CERTIFICATION REQUIREMENTS:

- A four-year degree
- 36 months leading projects
- 35 hours of project management education/training or CAPM® Certification

OR

- A high school diploma or an associate degree (or global equivalent)
- 60 months leading projects
- 35 hours of project management education/training or CAPM® Certification

DID YOU KNOW?

More and more employers are requiring their project managers to be certified (PMP®). Research indicates that employers will need to fill nearly 2.2 million new project-oriented roles each year through 2027.

PMP® certification provides credibility, enhances opportunities, and proves you have what it takes to deliver a project on time and in budget and scope.

Among all countries, the median salary for project managers with a PMP® is 25% higher than those without.

PROJECT MANAGEMENT PRIMER

High-level awareness of project management fundamentals. Participants learn from experienced project managers and are encouraged to bring their own project ideas to contemplate during the session.

PROJECT MANAGEMENT FOUNDATIONS

Participants leave with a more in depth understanding of what project management is, basic leadership skills, and some tools and templates to put into immediate use back at work.

PROJECT MANAGEMENT BEST PRACTICES

Receive a solid understanding and proficiency of best practices in project management that can be used in all endeavors by all people across all industries. Serves as real-world view of project management best practices after certification.

STANDARDS OF PROJECT MANAGEMENT

Designed for both practicing project managers and PMP exam aspirants, this material emphasizes a systems view of project management, centered on value delivery. Focused on the value chain linking portfolios, programs, and projects to organizational strategy and objectives.

PMP®/ CAPM® EXAM PREPARATION

Specifically designed to assist participants in preparing for the PMP® exam, given by the Project Management Institute (PMI®). We are an Authorized Training Partner with PMI®. This highly personalized course allows participants

focused time to learn and to review the concepts and terms necessary to pass the PMP® exam. Included with the course are tips, tricks, exercises, targeted materials, and two full length practice exams that will assist participants in reviewing for and passing the PMP® exam.

INTRODUCTION TO AGILE

Introduces the methodologies and practices of Agile development and explains the key concepts and principles that form the foundation of Agile project management.

AGILE PROJECT MANAGEMENT

Provides a solid understanding of the fundamental best practices of Agile approaches in a format that replicates a 2-day Agile Iteration Cycle. Participants learn concepts, terms, tools, and techniques from experienced Agile project managers.

BASICS OF DISCIPLINED AGILE

Explains the concept behind the Disciplined Agile toolkit and teaches participants how to choose the right approach for their project while improving their team's way of working.

DISCIPLINED AGILE SCRUM MASTER (DASM) EXAM PREPARATION

For those getting started with Disciplined Agile. Participants will understand the fundamentals of agile and lean approaches as well as how to implement the Disciplined Agile toolkit.

DISCIPLINED AGILE SENIOR SCRUM MASTER (DASSM) EXAM PREPARATION

Helps participants accelerate their ability to take on more complex initiatives and lead agile teams using Disciplined Agile.

PMI® AGILE CERTIFIED PRACTITIONER (PMIACP) EXAM PREPARATION

Spans many approaches to agile such as Scrum, Kanban, Lean, EX and TDD to increase participant's versatility and prepare to take the PM-IACP exam.

Project Management

PROJECT PROCUREMENT MANAGEMENT

Explains the processes, tools, and techniques used by project managers and project teams for project procurement management. Taught through hands-on activities led by an experienced project manager

PROJECT SCOPE MANAGEMENT

Focuses on balancing the needs of stakeholders with the project vision to determine the project and product scopes. Participants will learn how to develop a plan to determine, manage, and control the scope of a project through hands-on activities.

PROJECT COST MANAGEMENT

Participants learn the general approaches to cost management and the methods that are used to estimate and budget for project costs. Also learn about the interrelationships of various cost control concepts and how to respond to project budget overruns.

PROJECT INTEGRATION MANAGEMENT

Participants learn about resource allocation, balancing competing demands, examining alternative approaches, tailoring processes to meet project objectives.

PROJECT QUALITY MANAGEMENT

This course explains how the project manager and the project team can plan for, execute, and control quality on a project. Learn how the project team ensures that a project is completed at the level of quality required by all stakeholders.

PROJECT SCHEDULE MANAGEMENT

Learn all the processes that are required to manage the timely completion of a project and gain an understanding of the best practice processes of managing your project schedule, defining activities, sequencing activities, and estimating the durations.

**BUSINESS
ANALYSIS**

Through our training services, our skilled business analysts help increase business analysis knowledge and skills for continuous improvement. We offer a variety of business analysis courses to build awareness and understanding of business analysis principles and proficiency with best practices of business analysis. Our courses focus on those responsible for managing requirements and identifying business needs in their organization. It is a great value to have proficient business analysts work with project managers to ensure project and product requirements have been fully identified and understood, but a lot of times a business analyst is not available. Therefore, it is recommended that a well-rounded project manager gain sufficient awareness and understanding of business analysis processes and techniques. We also offer PMI's Professional Business Analysis certification and IIBA's CBAP course upon request.

SOLARITY

A HealthTech Solutions Company

BUSINESS ANALYSIS PRIMER

Participants learn common terminology and the skills needed to identify business needs and recommend relevant solutions from an experienced business analyst. This course serves as a foundation on which other business analysis courses build.

BUSINESS ANALYSIS FOUNDATIONS

Learn business analysis tools and techniques to assist with product and solution development. Gain an understanding of tools and techniques to immediately put into practice back at work.

BEST PRACTICES in BUSINESS ANALYSIS

Provides a realistic and interactive overview of what business analysis is and what a business analyst does within the framework of defining system solutions and interactions with a project manager and project team.

IIBA® CBAP®/CCBA® EXAM PREP BOOT CAMP

Accelerate preparation for the Certified Business Analysis Professional™ (CBAP®) exam by attending this boot camp. Developed and facilitated by CBAP® instructors, this boot camp provides an in-depth, structured approach to understanding the Business Analysis Body of Knowledge (BABOK®).

PMI-PBA® EXAM PREPARATION

This course is specifically designed to assist participants in preparing for the Project Management Institute's (PMI®) Professional in Business Analysis (PBA®) exam. Solarity, a HealthTech Solutions Company, is an Authorized Training Partner with PMI® and our trainers are certified through PMI's Train-the-Trainer program.

EMPOWERING YOUR TEAM TO THRIVE

At Solarity, we've developed an integrated approach to our business consulting and training services which we call our "Integrated Practices Management Model." With this model, we bring together relevant aspects from each service that we practice to enable high quality engagements with our clients.

OUR APPROACH

We partner with our customers to understand their issues and goals, develop a clear definition of their current state, design the desired future state, and create a measurable action plan for success.

OUR THREE STEP PROCESS

1. Assess the current situation
2. Define your desired future state
3. Act based on an approved plan

SOLARITY PRACTICE COMPONENTS:

Guiding Principles – ensure the Solarity team, through consistent behavior, demonstrates effective work ethic

Processes – a set of interrelated procedures that achieve results in an efficiently.

Templates – documents in a pre-defined format that provide a structure for collecting, organizing, and presenting information.

Tools – something tangible, such as a technique or software program.

Metrics – performance measures related to the delivery of a practice.

Wellness Checks – reviews completed, by an objective party, to ensure practices are followed and quality assurance is promoted.

Continuous Improvement – progressively elaborating the components of a Solarity practice through the comprehensive evaluation of the practice delivery which may lead to a practice enhancement.

SOMETHING YOU DID NOT SEE?

We provide customized course development tailored to your team or industry. Please reach out to discuss your needs with a member of the team!
